

Royal HaskoningDHV: A Global Specialist in Breweries

Royal HaskoningDHV has a unique international track record in design and construction management of breweries. With our international presence, vast experience and solid reputation, Royal HaskoningDHV is a key player in this particular market, in which we tailor our services to each brewery's individual requirements and local situation. We combine our international knowledge and experience in this field with a strong local presence in various locations in Europe, Asia and Africa.

Focusing on the Process

We understand that clients' processes ultimately determine the complexity of our assignment rather than the technical merits of the brewery structures. Developments and demands vary in every project, for every client and in every location. Our experience with the establishment of complex breweries around the world shapes our integral approach to brewery projects and design processes. Although the functionality outweighs the appearance of buildings serving the brewery process, there are exceptions where we create designs that are not only functional but also aesthetical, complementing the local surroundings.

Production: Brew house, silos, utilities, bottling hall and raw material handling

Amongst the brewery facilities we find various dedicated structures such as the brew house, the silo platform, the raw material handling and the bottling hall, as well as various tanks for fermenting and storage.

Our designs provide clear functionality and sustainable solutions. Features such as energy-recovery systems, treatment and recycling of waste water, use of sustainable materials as well as optimised logistics can all be integrated into the design.

Logistics

Logistics facilities, production and distribution departments and (equipment) suppliers provide the necessary input for the very basis of design. From this point, we are able to determine storage demands and integrate them with fully automated handling systems for example. As we understand the primary processes of the brewery we are able to manage emerging problems and issues within the process, delivering effective solutions as a result.

Royal HaskoningDHV: A Global Specialist in Breweries

Royal HaskoningDHV: a 'One Company' opportunity

Royal HaskoningDHV is an independent, international engineering and project management consultancy with over 135 years of experience. Backed by the expertise and experience of 6,500 colleagues all over the world, our professionals combine global expertise with local knowledge to deliver a multidisciplinary range of consultancy services for the entire living environment from over 150 countries. By showing leadership in sustainable development and innovation, together with our clients, we are working to become part of the solution to a more sustainable society now and into the future.

In all our projects, we at Royal HaskoningDHV strive to deliver the highest managerial and technological skills, to add value for you and meet the high quality standards you expect. Therefore we operate with continuous improvement to our management systems and customize our procedures to achieve the best co-operation with you.
