

Royal HaskoningDHV – Employer Value Proposition MEP Project Team Leader FINAL

Purpose

In 2050 we will have welcomed two billion extra humans to our planet. We strongly believe everybody deserves an equal opportunity to lead a healthy, happy and prosperous life. Our ambition is to run a financially healthy business by putting our collective intelligence into practice with clients and partners to have a positive impact on people, our living environment and the economy. We are commercial savvy engineers, project managers and consultants who design smart cities, airports, ports, buildings and more; making them more environmental friendly and healthier. We reinvent industries; co-create clean energy and fresh water by using smart data and digitizing information flows and models and thus connecting the digital world with the physical world we live in. We drive inclusive sustainable development with our clients in areas that we master and can actively influence. Our purpose is to Enhance Society Together.

People

We've been around for more than 135 years. Our people are keen to positively change the future and leave a legacy. We are eager to innovate and co-create. Our networked organization of smart entrepreneurs connects the best and brightest people in the world. The behaviors that we like to see and display are renewal, curiosity, recognition and trust. We treat each other with respect and we recognize each other for who we are and what we do. We value teamwork, ownership and empowerment. We are responsible for our own results. Every person is a source of inspiration, every person in our company has the possibility to make a difference, from designing new business models to creating scalable solutions that solve the world's most pressing issues. Together we create a future to be proud of.

Technology

More and more, we connect the digital with the real world in an accelerating pace. Working together with our clients and partners, we use data and algorithms to translate insights into foresights. Combined with our expertise we can help our clients to solve new challenges and prevent problems. Next to our focus on applying BIM to all our engineering projects, we experiment with and adopt new technologies such as generative design, artificial intelligence, virtual and augmented reality. We help our clients in their digital transformation and we support our clients' business with better and faster execution of their ambitions. With this we add value to society and we grow a financially healthy independent business.

Let's Enhance Society Together.

We currently have an open vacancy **MEP Project Team Leader** work in the Advisory Group Industry & Buildings (I&B) Vietnam at the HCMC office.

The successful applicants will be working in a very positive and professional environment. We offer on-the-job-training by international experts, good labor conditions and the possibility for inter-company rotation, if wished also outside Vietnam.

Role Responsibilities & Activities:

- Perform duties as assigned by the MEP/Process Department Manager.
- Project planning and monitoring.
- Manage design quality, progress and budget hours of the design team.
- Assist with the daily management and monitoring of the MEP Engineering Team in the performance of their duties.
- Ensure the delivery quality of engineering services (designs, reports, specifications, calculations) complies with Company requirements
- Assist with project allocation and timesheet approvals.
- Undertake checking (quality assurance) of design drawings, specifications, reports and calculations prepared by his/her team members prior to external and/or internal issue.
- Ensure that Company's design procedures and professional standards/rules are adhered too at all times.
- Lead the project team in preparing the design documents in AutoCAD and/or in Revit.
- Assist the team in preparing MEP design briefs, documents, design reports and specifications prior to the review of MEP Technical TLs.
- Ensure all the designs are in accordance with approved local and international standards/codes.
- Ensure the accuracy of all design calculations and drawings, and have these documents reviewed by MEP Technical TLs prior to external and/or internal issue.
- Review any propose technical innovations suggested by the design team. Ensure such suggestions are feasible and applicable to the project. Submit approved suggestion to the MEP Dept. Manger for comments and approval.

- Lead the team in reviewing alternative design options and material submissions proposed by contractors. Provide any comments to the Project Manager and/or Dept. Manager for their endorsement.
- Liaise/interact with the project manager, project architects, other engineering disciplines, sub-consultants and clients as required.
- Manage interactions with other disciplines/departments as well as external parties i.e. clients, local authorities, contractors.
- Advise the Dept. Manager of any problems that may alter the target design completion/submission dates of any assigned project.
- Assist Dept. Manager in preparation of proposals and other tasks.
- Prepare a daily work record to monitor progress of the team and submit a weekly progress report of each project to the Dept. Manager.
- Undertake continuous professional training & development to maintain Chartered/Expert status.

Qualifications:

- University graduate or Master of Science in Mechanical, Environmental or Electrical Engineering field.
- Be a licensed Mechanical/Electrical/Environmental Engineer, or possess at least equivalent Chartered or Registered Engineering accreditation and membership from a Professional Engineering Institution in another country.
- Proficient in English (listening, speaking, reading & writing).
- Good communication in both English and Vietnamese languages.
- Proficient in Revit, ACAD, MS office applications.
- A minimum of 5 years' experience leading MEP Engineering teams within a professional multinational organization.
- Previous experience working within an Engineering consulting environment, with a clear focus on design experience.
- At least 8 years of post graduate experience within their specialized discipline, preferably with professional foreign companies.
- Good understanding of QA procedures.
- Advanced knowledge of International Building Codes and Design Standards including environmental building standards (LEED and similar). Familiar with green building design is preferred.
- Intermediate leadership skills with the ability to manage teams with a strong results-orientation.
- Proven record of executed project is highly desired.
